

# Process for access to therapy on the school site

Applications for external support/therapists to provide services on the school site, during school hours, may only be made by parents or guardians. The exception to this will be services that meet the requirements under government regulation or legislation for example SSENS visiting teachers.

## Process for requesting for support/therapy services in school during school time

### Notes:

1. Where a therapist is making observations only, a copy of the therapist's CEWA Child Protection Procedures and Mandatory Reporting online training and the Request for Clinical Access to School form will be required before the therapist can commence any school-based observations.
2. The school will communicate only with the parent/guardian of the student involved.
3. Any direct requests from therapy services to the school without prior arrangement of parent/guardian and the completion of the relevant documentation will not be approved.
